Profile

Computer Engineering graduate specializing in Cloud Computing, with a strong interest in network engineering and IT infrastructure. Experienced in frontend development with React and TypeScript, AWS cloud solutions, and Linux environments, while developing practical skills in networking, troubleshooting, and security. Passionate about building secure, reliable, and scalable network infrastructures.

Education

Bachelor of Technology in Computer Engineering

2024 – 2025

Institut Universitaire de la Côte (IUC)

Higher National Diploma (HND) in Software Engineering

2022 – 2024

Jacky Felly Nafack Hightech University Institute (JFN-HUI)

Technical Skills

Frontend

- HTML
- CSS
- React

Cloud & AWS

- Amazon S3
- AWS Lambda
- Amazon RDS

Systems & Tools

- Linux (Ubuntu)
- GitHub
- VS Code

Projects

DocuTrack Pro – Cloud-Based Document Management System

Technologies: React, TypeScript, AWS Lambda, API Gateway, Amazon S3, Amazon RDS (MySQL), IAM, REST API

- Developed a cloud-based document management system with role-based access for clients, processing staff, and administrators.
- Built a serverless backend using AWS Lambda and API Gateway to support authentication and document-processing workflows.
- Integrated Amazon RDS (MySQL) for structured data storage and Amazon S3 for hosting, supporting scalability and reliability.

Digitalization of CAMTEL's Warehouse Management

Tools and Skills: Microsoft Excel, Inventory Management, Data Preparation, Data Verification, Data Reconciliation.

- Participated in a warehouse digitalization project involving physical inventory and data preparation across CAMTEL warehouse locations in Douala.
- Conducted on-site material identification and counting, recording inventory details and quantities in Excel using the required format.
- Cross-checked inventory records against physical stock, helped resolve discrepancies, unreconciled items, and prepared Excel files for processing through the warehouse management application.

Experience

Administrative and System Support Intern

September 2025 – March 2026

National Social Insurance Fund (NSIF) Cameroon

- Document & Records Management (Archiving).
- Communication & Customer Service.
- Organization & Attention to Detail.
- Teamwork & Problem-Solving.

Network Engineering Intern

September 2026 – Present

Cameroon Telecommunications (CAMTEL)

- Gain practical exposure to telecommunications infrastructure, network-related equipment, and technical working environments.
- Participate in assigned technical and operational activities under the guidance of experienced personnel.
- Contributed to a warehouse management digitalization project involving physical inventory, data preparation, and inventory verification using Microsoft Excel.

Languages

English **French**

Interests

Cybersecurity, Cloud Security, Network Security, Linux, Networking, Emerging Cloud Technologies, and Secure Cloud Infrastructure.
